Luxurious Geometry

Designed by the F.A. Porsche Design Studio, the F1 collection of bath faucets boasts an oversized cone shape, aluminum finish, and a hefty feel. The single-hole center-set faucet uses two small levers, positioned one above the other, that glide horizontally to control the flow and temperature of water; they can be operated singly or simultaneously. Modern Look

The Mini Nikko bath vanity features three door insert options: rice paper, rattan, or solid panels; the wood top accommodates any vessel sink or basin. The 32-inch-high vanity comes in 40 finishes, and a 38-inch-high matching mirror is also available. Vanity Flair. 888.479.4108. www.vanityflair.net. **Circle 176**

Double Take

Designed to ventilate several areas of a bathroom through one remote-mounted fan, Dual-Port exhaust kits are Energy Star qualified and come in a variety of sizes. The DLX200 kit includes a 408-cfm fan that is capable of exhausting a 210- to 350-square-foot bathroom, the maker says. Fantech. 800.747.1762. www.fantech.net. **Circle 177**

Sounds of Silence

The WhisperLite ventilation fan utilizes patent-pending technology to deliver the lowest sone levels currently available, according to the maker, ranging between .4 and 1.4 sones. Two-storied, double-tapered dolphin-shaped fan blades and a baffle plate with double-orifice technology reduce the noise transmission. D-Lightful

Created by designer Dieter Sieger, the Happy D bath suite features six different soaking tub models, matching shower trays, a toilet, a bidet, and a sink. The tubs and shower trays are made of the manufacturer's UltraAcryl, which is cast between two polished glass sheets to yield a smooth, non-porous surface.
