FOR IMMEDIATE RELEASE:

A Well-Rounded Appeal!

Vanity Flair's Artistry Collection Brings Modern Art Deco Flair To The Bathroom.

(Canton, GEORGIA – October 26, 2006) With curving lines that echo the graceful sweep of an artist's paintbrush, the Artistry Collection from Vanity Flair offers a unique line of custom bathroom furniture inspired by Art Deco design.

The rounded silhouette, streamlined shape and contrasting colors are all hallmarks of classic Art Deco style. Vanity Flair is proud to bring that popular era to life with its sleek Artistry collection, pictured here in a warm Clear Walnut with Figured Maple finish. The stylish vanity sits atop four curved legs for an airy feel and offers three roomy drawers for plenty of practical storage. Order the vanity in pairs with an adjoining bridge, as shown here, to create a spacious double vanity with a center make-up area with its own dedicated drawer space. The rich wood countertop is the perfect setting for a drop-in sink of your choosing. Just above the vanity is a matching circular mirror with convenient shelf in coordinating wood tones.

Continue the Art Deco theme by indulging your bathroom with the custom Artistry Tub Box. As beautiful from the side as from the end with luxurious wood grains and moldings, the tub surround creates a stunning focal point for the most luxurious of bathrooms and is the perfect retreat for a soothing soak at the end of a long day.

Artistry Tub Box

As with all of Vanity Flair's custom designs, the Artistry collection is available in more than 40 distinctive finishes. Depending on the selected finish, the pieces are priced as follows: Artistry Vanity with Bridge -- \$11,674; M-38 Mirror -- \$2,750; Wood Top -- \$1,590; Artistry Tub Box -- \$7,995.

Vanity Flair is a Furniture Guild Company that has been creating beautiful bathroom environments for the most discerning clientele since 1984. The company takes great pride in combining Old-World craftsmanship with the latest technology, such as using laborious hand-finishing techniques and a traditional dovetail construction process as well as an in-house engineering department with the latest in CAD software.
